

APPRENTICESHIP IN METAL FABRICATION

Kelly Engineering is an award winning business renown for the manufacturing of quality agricultural machinery, in particular the Kelly Diamond Harrow, among other specialized Kelly Tillage systems, which is used across Australia and exported around the world.

Kelly Engineering prides itself in striving for best in class manufacturing processes, with a huge focus on Innovation, Research & Development. We make significant investment each year in supporting a positive workplace culture, because we recognize that our valuable workforce has contributed to our success.

Visit the website www.kellyengineering.com.au to view our products.

We are seeking to consolidate our workforce by training and investing in a number of new apprentices from January 2017

To be considered for an apprenticeship, you will need to;

- ✓ be a highly motivated individual, with a positive attitude to learning and working;
- ✓ have successfully completed year 11, and preferably year 12;
- ✓ have a commitment to a company that will continue to expand in the future

If you possess these qualities, you may be one of the persons that we wish to interview.

You can forward an application along with your resume that includes 3 current referees, before 5:00pm on Friday the 4th November 2016 to;

Luke Ellery
Production Manager
Kelly Engineering
